

ADDITIONAL INFORMATION REGARDING ELECTRONIC CLINICAL QUALITY MEASURES (ECQMS) FOR CMS QUALITY REPORTING PROGRAMS FOR OUTPATIENT QUALITY REPORTING (OQR)

The table below titled “Electronic Clinical Quality Measures for Outpatient Quality Reporting” includes up-to-date information for Electronic Clinical Quality Measures (eCQMs) that will be used to electronically report 2024 clinical quality measure data for the Centers for Medicare & Medicaid Services (CMS) quality reporting programs. Measures are not eligible for 2024 reporting unless and until they are proposed and finalized through CMS notice-and-comment rulemaking for each applicable program. Subsequent updates will be provided in a new version of this table with a summary of the updates located in a version history table at the end of the document.

Please note, because measure stewards updated the titles and descriptions for the eCQMs in this table, they may not match the information provided on NQF’s website. Measures that do not have an NQF number are measures that are not currently endorsed.

ELECTRONIC CLINICAL QUALITY MEASURES FOR OUTPATIENT QUALITY REPORTING

CMS eCQM ID	NQF #	Measure Title	Measure Description	Numerator Statement	Denominator Statement	Measure Set Identifier
CMS996v4	3613e	Appropriate Treatment for ST-Segment Elevation Myocardial Infarction (STEMI) Patients in the Emergency Department (ED)	Percentage of emergency department (ED) encounters for patients 18 years and older with a diagnosis of ST-segment elevation myocardial infarction (STEMI) that received appropriate treatment, defined as fibrinolytic therapy within 30 minutes of ED arrival, percutaneous coronary intervention (PCI) within 90 minutes of ED arrival, or transfer within 45 minutes of ED arrival.	Emergency department encounters with a diagnosis of STEMI: - where time from ED arrival to fibrinolysis is 30 minutes or fewer; OR - where PCI is performed within 90 minutes of arrival for non-transfer patients; OR - where the patient is transferred within 45 minutes of ED arrival	Measure/Initial Population: All emergency department encounters for patients 18 years and older at the start of the encounter with a diagnosis of ST-segment elevation myocardial infarction (STEMI) during an Emergency Department encounter that ends during the measurement period.	OP-40 (STEMI)
