

ADDITIONAL INFORMATION REGARDING ELECTRONIC CLINICAL QUALITY MEASURES (eCQMs) FOR CMS QUALITY REPORTING PROGRAMS FOR ELIGIBLE HOSPITALS (EH) AND CRITICAL ACCESS HOSPITALS (CAH)

The table below entitled “Electronic Clinical Quality Measures for Eligible Hospitals and Critical Access Hospitals” contains additional up-to-date information for Electronic Clinical Quality Measures (eCQMs) that are to be used to electronically report 2020 clinical quality measure data for the Centers for Medicare & Medicaid Services (CMS) quality reporting programs. Measures will not be eligible for 2020 reporting unless and until they are proposed and finalized through notice-and-comment rulemaking for each applicable program. Subsequent updates will be provided in a new version of this table. CMS will maintain and publish an archive of each update.

Please note measure stewards updated the titles and descriptions for the eCQMs included in this table and therefore they may not match the information provided on NQF’s website. Measures that do not have an NQF number are measures that are not currently endorsed.

ELECTRONIC CLINICAL QUALITY MEASURES FOR ELIGIBLE HOSPITALS AND CRITICAL ACCESS HOSPITALS

CMS eCQM ID	NQF #	Measure Title	Measure Description	Numerator Statement	Denominator Statement	Meaningful Measure Area	Measure Set Identifier
CMS9v8	0480e	Exclusive Breast Milk Feeding	PC-05 Exclusive breast milk feeding during the newborn's entire hospitalization. The measure is reported as an overall rate which includes all newborns that were exclusively fed breast milk during the entire hospitalization.	Inpatient hospitalizations for newborns who were fed breast milk only since birth	Equals Initial Population: Inpatient hospitalizations for single newborns with an estimated gestational age at birth of ≥ 37 weeks who are born in the hospital and who did not have a diagnosis of galactosemia, were not subject to parenteral nutrition, and had a length of stay less than or equal to 120 days that ends during the measurement period	Care is Personalized and Aligned with Patient's Goals	PC-05
CMS71v9	Not Applicable	Anticoagulation Therapy for Atrial Fibrillation/Flutter	Ischemic stroke patients with atrial fibrillation/flutter who are prescribed or continuing to take anticoagulation therapy at hospital discharge	Inpatient hospitalizations for patients prescribed or continuing to take anticoagulation therapy at hospital discharge	Inpatient hospitalizations for patients with a principal diagnosis of ischemic stroke, and a history of atrial ablation, or current or history of atrial fibrillation/flutter	Preventive Care	STK-03
CMS72v8	Not Applicable	Antithrombotic Therapy By End of Hospital Day 2	Ischemic stroke patients administered antithrombotic therapy by the end of hospital day 2	Inpatient hospitalization for patients who had antithrombotic therapy administered the day of or day after hospital arrival	Inpatient hospitalizations for patients with a principal diagnosis of ischemic stroke	Preventive Care	STK-05
CMS104v8	Not Applicable	Discharged on Antithrombotic Therapy	Ischemic stroke patients prescribed or continuing to take antithrombotic therapy at hospital discharge	Inpatient hospitalizations for patients prescribed or continuing to take antithrombotic therapy at hospital discharge	Inpatient hospitalizations for patients with a principal diagnosis of ischemic stroke	Preventive Care	STK-02
CMS105v8	Not Applicable	Discharged on Statin Medication	Ischemic stroke patients who are prescribed or continuing to take statin medication at hospital discharge	Inpatient hospitalizations for patients prescribed or continuing to take statin medication at hospital discharge	Inpatient hospitalizations for patients with a principal diagnosis of ischemic stroke	Preventive Care	STK-06

CMS eCQM ID	NQF #	Measure Title	Measure Description	Numerator Statement	Denominator Statement	Meaningful Measure Area	Measure Set Identifier
CMS108v8	Not Applicable	Venous Thromboembolism Prophylaxis	This measure assesses the number of patients who received VTE prophylaxis or have documentation why no VTE prophylaxis was given the day of or the day after hospital admission or surgery end date for surgeries that start the day of or the day after hospital admission	Inpatient hospitalizations for patients who received VTE prophylaxis: - the day of or the day after hospital admission - the day of or the day after surgery end date for surgeries that end the day of or the day after hospital admission Inpatient hospitalizations for patients who have documentation of a reason why no VTE prophylaxis was given: - between the day of arrival and the day after hospital admission - the day of or the day after surgery end date (for surgeries that end the day of or the day after hospital admission)	Inpatient hospitalizations for all patients in the initial population	Preventive Care	VTE-1
CMS111v8	Not Applicable	Median Admit Decision Time to ED Departure Time for Admitted Patients	Median time (in minutes) from admit decision time to time of departure from the emergency department for emergency department patients admitted to inpatient status	Measure Observations Statement: Time (in minutes) from Decision to Admit to ED facility location departure for patients admitted to the facility from the emergency department	Measure Population is equal to the Initial Population: Inpatient Encounters ending during the measurement period with Length of Stay (Discharge Date minus Admission Date) less than or equal to 120 days, and where the decision to admit was made during the preceding emergency department visit at the same physical facility unless the ED and admitting hospital share the same CCN	Admissions and Readmissions to Hospitals	ED-2

CMS eCQM ID	NQF #	Measure Title	Measure Description	Numerator Statement	Denominator Statement	Meaningful Measure Area	Measure Set Identifier
CMS190v8	Not Applicable	Intensive Care Unit Venous Thromboembolism Prophylaxis	This measure assesses the number of patients who received VTE prophylaxis or have documentation why no VTE prophylaxis was given the day of or the day after the initial admission (or transfer) to the Intensive Care Unit (ICU) or surgery end date for surgeries that start the day of or the day after ICU admission (or transfer)	Inpatient hospitalizations for patients who received VTE prophylaxis: - the day of or the day after ICU admission (or transfer) - the day of or the day after surgery end date for surgeries that end the day of or the day after ICU admission (or transfer) Inpatient hospitalizations for patients who have documentation of a reason why no VTE prophylaxis was given: - between the day of arrival and the day after ICU admission (for patients directly admitted as inpatients to the ICU) - the day of or the day after surgery end date (for surgeries that end the day of or the day after ICU admission (or transfer))	Inpatient hospitalizations for patients directly admitted or transferred to ICU during the hospitalization	Preventive Care	VTE-2
