Agenda

• Welcome
• Introduction to CMS QRDA
  – Annual CMS QRDA documents
  – Appendix to 2016 CMS QRDA Implementation Guide (IG)
• Common submission errors – Eligible Professionals, Eligible Hospitals, and Comprehensive Primary Care
• Cypress Validation Utility demonstration

• Questions?
Annual CMS QRDA Documents

- CMS QRDA Implementation Guide for Eligible Professional Programs and Hospital Quality Reporting
- QRDA I and QRDA III Schematrons
- Sample Files
- Addendum
- Appendix
- Found on the eCQI Resource Center and on the CMS eCQM Library

2016 CMS QRDA IG Overview

- Part A – QRDA-I for Eligible Professionals (EPs) and Hospital Quality Reporting
- Part B – QRDA-III IG for EPs
- Appendices
  - Troubleshooting and Support
  - Additional QRDA-I Validation Rules for HQR Programs
  - Null Flavor Rules for Data Types
  - QRDA-I Draft Standard for Trial Use (DSTU) R3 Supplemental IG Changes to Base Standard
  - QRDA-III DSTU R1 Supplemental IG Changes to Base Standard
  - Change Log for 2016 CMS QRDA IG from the 2015 CMS QRDA IG
- Appendix to the 2016 CMS QRDA IG

Common submission errors
Top Five HQR Submission Errors

1. Encounter Performed Admission Date (low value) is after the Encounter Performed Discharge Date (high value)
2. The document does not conform to QRDA document formats accepted by CMS
3. Reporting Period Effective Date Range does not match one of the Program's CY Discharge Quarters
4. This patientRole SHALL contain exactly one [1..1] id such that it SHALL contain exactly one [1..1] Patient Identifier Number
5. Discharge Date is not within the Programs CY discharge quarter
Sample XML – EH error

Error:
Admission Date is after the Discharge Date
<low value="20150312090000+0500"/>
<high value="20150306103000+0500"/>

Error Message:
The system SHALL reject QRDA-I files if the Encounter Performed Admission Date (effectiveTime/low value) is after the Encounter Performed Discharge Date (effectiveTime/high value) (CONF: CMS_0062).

How to fix (example):

</tbody>

Sample XML – QRDA-I EP Error

Error:
Value Set Validation Failed

Validation fails because Diabetes value set (OID: 2.16.840.1.113883.3.464.1003.103.12.1001”) , a diagnosis value set, is in the Encounter Performed template where a valid Encounter value set is expected.

How to fix:

1. Value set OID provided in the @sdtc:valueSet attribute must be from the proper QDM Category that the patient data entry template belongs to.

2. Code and code system provided in the @code and @codeSystem attributes must be a valid code and code system from the value set provided in the @sdtc:valueSet attribute.
## Top Five Common EP Programs QRDA-III Submission Errors

<table>
<thead>
<tr>
<th>Error Code</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>10763</td>
<td>Incorrect UUID values for the reported data element for the related measure as specified in the CMS IG.</td>
</tr>
<tr>
<td>PQRS_10727</td>
<td>The Performance Numerator should be less than or equal to reporting denominator.</td>
</tr>
<tr>
<td>10765</td>
<td>Invalid number of population templates have been found in the submitted data for various measures.</td>
</tr>
<tr>
<td>PQRS_10705</td>
<td>The required number of performance rates, in a QRDA-III file submission, are not included for a multi-performance rate measure.</td>
</tr>
<tr>
<td>26992</td>
<td>In the measure data section, the Version Neutral Identifier GUID should be identified for the submitted measure. Note: This is a different GUID than that of the version specific identifier. (CONF:21159).</td>
</tr>
</tbody>
</table>
Sample XML – QRDA-III EP Error

Error: Incorrect UUID

Use a QRDA-III file for eCQM CMS165v3 as an example:

The correct population GUID for the Numerator Population as specified in CMS165v3.xml (HQMF file) is:
0899a359-0cd8-4977-aa29-666892aa3ad4

How to fix:

1. Use the correct Annual Update eCQM specifications for the CMS reporting period. Use the correct version specific measure identifier of an eCQM.
2. Use the correct UUIDs for populations and reporting stratifications (if applicable).

New Tools to Help Reduce Submission Errors

• For eligible hospitals
  – Pre-Submission Validation Application (PSVA)
  – CMS Secure Portal
• For eligible professionals
  – Submission Engine Validation Tools (SEVT)
• For HIT vendors
  – Cypress QRDA Validation Utility
For more information about these tools

Cypress Validation Utility
Cypress Validation Utility

- Web based QRDA validator
  - https://validator.projectcypress.org
- Supports Base & CMS QRDA Implementation Guides
- Synthetic patients/data only
- Intended audience is developers building test QRDA documents for certification and submission
**WARNING:** This utility is meant for synthetic patient records only. **DO NOT** upload documents containing Protected Health Information (PHI) or Personally Identifiable Information (PII).

The Cypress QRDA Validation Utility is intended as a development tool for EHR vendors who are testing synthetic QRDA Category I and Category III documents for conformance to CMS submission requirements. Files submitted for validation must not contain PHI or PII.
